

4-Decimal Call Rounding

On Dedicated Calls

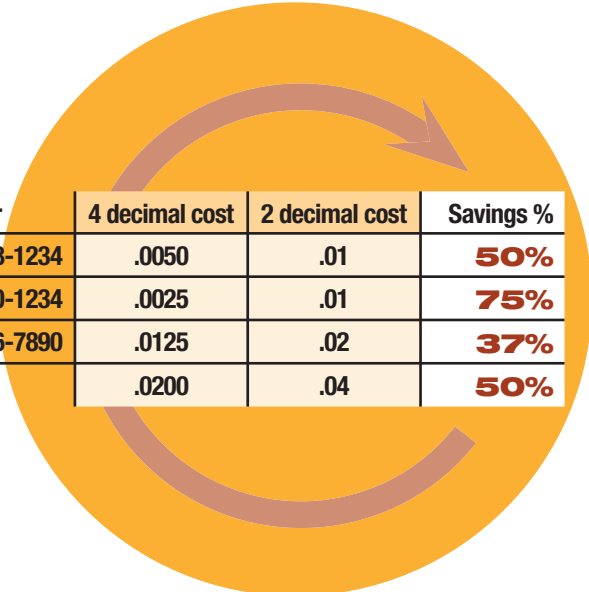

How does 4 decimal rounding save me money?

Many telecommunications companies round up to the nearest cent on individual calls. When your rate involves a fraction of a cent, you save money by not rounding up on individual calls.

What calls save most from decimal rounding?

Really, you save money on all calls when your rate involves a fraction of a cent. Each call is rounded to the 4th place and only rounded up to the nearest whole cent at the summary level.

Minutes*	Destination	Number	4 decimal cost	2 decimal cost	Savings %
.2	Dallas, TX	214-888-1234	.0050	.01	50%
.1	Seattle, WA	206-890-1234	.0025	.01	75%
.5	Phoenix, AZ	602-456-7890	.0125	.02	37%
.8 Total Minutes			.0200	.04	50%

*For comparison, sample calls are based on a rate of .025¢ per minute.
