

## Voice, Data and Much More— All From One Source

By Sarah Graham Linares  
TMC Vice President of Product Development

At TMC, we've developed a broad portfolio of products that deliver low-cost, reliable telecommunication solutions designed for businesses and supported by top-rate customer service. Whether serving a large call center or medium-sized business, TMC is keenly aware how critical telecommunications are to its customers' ongoing success.

With over 10,000 voice and data circuits installed, our track record speaks for itself.

In addition to the broad range of products we offer, TMC pricing on Private Lines and Dedicated Internet Access is at an all-time low. Have a question about capacity and assessing your business' data needs? Our team works with you and your telecom agent to help you select the right data service for your business and your budget. See the article "Looking to Decrease Costs Every Month" on back to learn more.

We can also provide you with services that help you run your business more efficiently. TMC's Liveline Conferencing and Travel Cards keep your team connected while reducing your expenses. See the article "Two Ways to Stay Connected and Get Control of Expenses" to learn more about these cost-saving services.

Adding another TMC service to your account is easy. Your new service is simply added to your invoice and our customer care team supports it along with your other TMC services. You receive one invoice and deal with one point of contact for all of your telecom needs.

If you have a question or are interested in learning more, please call your telecom agent or contact us directly at 866-999-1155. You can also visit [www.tmccom.com](http://www.tmccom.com) for details on all the TMC services available to you.

## Ways to Stay Connected and Get Control of Expenses

### TMC Calling Cards

TMC's Global Access Travel Card is a convenient and affordable way for you to stay connected when traveling. Use the travel card when calling from the US or from over 100 other countries. The cards are also ideal in areas with poor cell phone coverage. Travel cards are issued free of charge and there are no monthly service fees— you pay only for the calls you make! Interested in learning more? Contact a member of our Customer Care team at 866.999.1155 or visit our website at [www.tmccom.com](http://www.tmccom.com).

### TMC LiveLine Conferencing

Cut down on travel time and bring your team together with TMC LiveLine Audio & Web Conferencing. Both audio and web conferencing

are available to you at a low per minute rate with no minimums or setup charges. You only pay when you use the service. And you monitor your account and costs through a self-serve website. Interested in learning more? Contact a member of our Customer Care team at 866.999.1155 or visit our website at [www.tmccom.com](http://www.tmccom.com).

# Looking to Decrease Costs Every Month? Check Out Dedicated Internet Access with TMC

Our loops and ports are priced to sell. TMC dedicated internet access is an economical choice, regardless of your data requirements. Select the bandwidth that best suits your business requirements or choose a flexible service that grows with you. Call your TMC agent representative or call us directly at 866-999-1155.

## T1

This service offers Internet access at 1.5 Mbps of bandwidth at a low, fixed monthly cost. Ideally suited for businesses that have a large number of Internet users, a high volume Intranet application, or host their own websites.

## DS3 - OC48

As your demand for Internet bandwidth grows, TMC can deliver Internet access in increments of 45 Mbps, OC3, OC12 and OC48 Mbps.

## Fast Ethernet & Gigabit Ethernet

For customers that operate in the 10/100/1000 Mbps Ethernet environment, TMC offers this cost effective solution for high volume Internet traffic from multiple user LANs, heavy data exchange from web servers and more.

## Tiered / Burstable

Manage the peaks and flows of your data usage through TMC's scalable solutions. As your bandwidth needs fluctuate throughout the month, this option offers full bandwidth availability while you are invoiced based on the amount actually used.

## Bonded Internet NxT1s

Bonded Internet NxT1s are an affordable solution for businesses that require more than 1.5 Mbps of bandwidth but less than a DS3. When you bond DS1 circuits together, you'll receive the bandwidth you need without the expense of a monthly DS3 loop charge.

## Integrated Access

Give your business unprecedented communications power by combining voice and data over a single high-speed connection.

## It's 3am— How can we help you?

When you call, we answer— 24 hours a day, seven days a week! At TMC, we don't force you to wade through an automated customer support line. A live, knowledgeable telecom professional answers every time. Contact us any time, day or night, at 866-999-1155 or [customercare@tmccom.com](mailto:customercare@tmccom.com).

## Level 3 Acquires Broadwing: What This Means for You.

Two of TMC's carrier-partners have joined together. On January 3, 2007, Level 3 completed its acquisition of Broadwing. According to Kevin O'Hara, president and chief operating officer of Level 3, "The acquisition of Broadwing benefits Level 3 in two distinct areas. The integration of the Broadwing backbone presents significant synergy opportunities, and the expansion of the customer base provides strategic growth opportunities for us moving forward."

TMC has strong, long-standing partnerships with both Level 3 and Broadwing. We look forward to providing you with reliable service and new innovative products from the new Level 3 network.
